

Lucky Rainbow

Creators: Andrea Brizzi, Edoardo Delbelli, Diego Coslovich

Country: Italy

Instructions:

- At the beginning of the game each player has 100 points
- Put your playing piece where it says "Start"
- Roll the die and move the number of spaces shown.
- According to the color you've landed on you must think of something you associate with that color. For example: you land on 'Orange' and it reminds you of a "Leaf" in autumn.
- Using the letters in your association word you must build other words.
The first letter must be a person's name. "L = Leopold"
The second letter must be an animal. "E= Elephant"
The third letter must be a city/town name. "A= Annapolis"
The fourth letter must be a food. "F= French fries"
The fifth letter must be an object.
The sixth letter must be a brand name.
The seventh letter must be a movie title.
(We recommend coming up with a short association word because the longer the word the more letter challenges you will have!)
- You have 30 seconds per letter to think up a word.
- If your answer is incorrect or you can't think of a word you lose 10 points per letter.
- If you answer everything correctly and in time you receive an extra 5 points
- If you land on yellow you get an extra 10 points
- If you land on black you automatically lose 15 points before starting the challenge.
- The person who accumulates the most points once they've reached the "Finish" line wins the game!
